PROFILE SUMMARY

Aspiring DevOps Engineer with 1+ year of hands-on experience in Kubernetes, Docker, AWS, and CI/CD pipeline automation. Skilled in cloud infrastructure, secure application deployment, and DevOps workflows for scalable systems.

EDUCATION

Maharashtra Institute of Technology

Aurangabad, Maharashtra

Bachelors In Computer Science and Engineering

2022-2026

SKILLS

Technical skills:

Tools: Python , SQL, Docker, Kubernetes, Jenkins CI/CD, Argocd , Ansible, Terraform, Gitops, Linux, React JS , Express JS,

Node JS, Dynamo DB

EXPERIENCE

Cyber Sanskar

Nashik, Maharashtra

Software Development & DevOps Intern

Jan-May(2026)

- Implemented an end to end Devops Automation pipeline for an training full stack application
- Orchestrated k8s Pods in scalable AWS EKS Clusters to improve uptime by 99%
- Managed security and robustness of the application with Docker Private registries and secrets manager.

PROJECTS

Secunexus Threat Detection Mobile Application

2024-2025

- Used Kotlin with Jetpack Compose to create the Android app interface and security processes. Suspicious URLs were detected in real time with a phishing alert and an in-app alert system involving dual series of alerts when users visit potentially harmful sites.
- Tracked which URLs were blocked or allowed by using Room, while also verifying each application through testing, debugging, and performance enhancement to increase reliability and improve user safety from potentially harmful sites.

Twitter Sentiment Analysis

2023-2024

- I built a Twitter sentiment analysis platform that utilizes both NLP and machine learning to categorize tweets into positive, negative, or neutral categories. To achieve effective sentiment prediction accuracy for Twitter, I pre-processed the original tweet content utilizing the TF-IDF method.
- I also created both Naive Bayes and Support Vector Machine models that were then used to classify tweets based on their level of sentiment associated with them.

ACHIEVEMENTS

- Earned **AWS Cloud Practitioner** completion certificate with hands-on experience in foundational AWS cloud services.
- Earned **Google Cloud Arcade** milestone rewards by successfully completing hands on labs (2023-2024)
